ORGANIC CERTIFIED. HAND-MADE CBD SKINCARE

CATALOGUE

OUR STORY

VIDA was born in 2015, In Amsterdam, The Netherlands. Our first products were facial oils and multi-purpose balms. The move to Croatia happened in 2017 – when founder Jennifer Deegan was seeking a more natural environment to live in as well as source ingredients from. We currently grow hemp locally and harvest wild lavender from the infamous island of Hvar. Helichrysum (Immortelle), comes from the coastal areas of southern Croatia. And where ever possible we purchase locally grown, harvested and pressed oils too.

Vida was created for people with sensitive skins, like mine. A life long battle with exzema made it very tricky to find products that agreed with my skin. So, when you are that desperate you make your own. After a lot of research and 3 years of studies – my eczema went away, and has never flared up again ever since. It is not only pure and natural skincare to thank, but also a cleaner lifestyle and diet.

THE STAR INGREDIENT - “CBD” CANNABIDIOL

We produce our unique range of cosmetics with many incredible ingredients, but for us, the star remains CBD – Cannabidiol from Hemp. If you have heard of the benefits of hemp and CBD, you’re going to love Pura Vida Organic CBD cosmetics and skincare products.

THE THUMB PRINT STORY

Our logo consists of a thumbprint texture on a hemp leaf. The thumbprint symbolizes – the unique way in which we produce our organic cosmetics - by hand, and additionally encapsulates the concept of organic CBD skincare.

Our selection of suppliers is based on cultivation and processing methods using as little machinery as possible, we are adamant in preserving the quality and richness of our raw ingredients - something only possible when done by hand. We carry this belief through to our production labs, where we use hand-made manufacturing techniques from mixing and filling to labelling and boxing.

Therefore, each product is unique. Each product has its unique human touch. Each product has been lovingly made by the hands of the women in our team. And not one product is exactly the same as the other – just like our own very unique set of fingerprints. (perhaps the label is a bit off-center, perhaps the colour of the cream is slightly different and perhaps the colour of the 25%-grass and recycled cardboard box is slightly different than the ones before) – this is all because we are unique, and so is nature. In nature an exact replicate hardly ever exists. With changing seasons and different soils, so the fruits that are harvested are never exactly the same as the year before.

You can rest assured, that the quality of the ingredients are always of the highest purity and top quality. And the quantity of CBD and other ingredients are always consistent.

The thumb print in the hemp leaf represents our VIDA line of CBD infused organic certified skincare.

The hemp tree is our tree of life. From this amazing plant we can do so many things – food, medicine, textile, animal feed, plastic, paper, job creation, detoxing of our soils and much much more.

I hope you find a little inspiration here and fill your life with true beauty!
